

Brokerage fees

Final execution by Interactive Brokers

Prices applicable as of October 28, 2025

All prices in this document include VAT

ProRealTime offers reception and transmission of orders services on leveraged financial instruments with the broker Interactive Brokers who provides order execution services. **Trading on leveraged instruments (Futures, selling options, short selling) exposes you to risk of loss greater than your deposits and is only suitable for experienced clients who have sufficient financial means to bear such risk.** CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. **60% of retail investor accounts lose money when trading CFDs and spread bets with Interactive Brokers.** You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money. No information on this site is investment advice or a solicitation to buy or sell any financial instrument.

ProRealTime is a trading name of ProRealTime SAS, an investment company approved and supervised by the French financial authorities (Autorité de Contrôle Prudentiel et de Résolution / Banque de France).
ProRealTime SAS (Simplified joint-stock company) - N° 499 355 444 RCS Nanterre - EU VAT number: FR90499355444.
Head office: ProRealTime SAS - 30 avenue Edouard Belin - 92500 Rueil-Malmaison - France.

Choose the profile which fits you best

The Trader pricing is applied by default to new accounts for the first 4 calendar months.

Past this period, you will keep the Trader or Active pricing if you meet at least one of the following conditions during the last 3 months:

TRADER

- **Stocks, ETFs:** more than **30 round-trip trades¹ per month** (on average)
- **Futures and Options:** more than **60 contracts traded² per month** (on average)
- **Metals:** more than **30 round-trip trades¹ per month** (on average)

ACTIVE

- **Stocks, ETFs:** more than **15 round-trip trades¹ per month** (on average)
- **Futures and Options:** more than **30 contracts traded² per month** (on average)
- **Metals:** more than **15 round-trip trades¹ per month** (on average)

Only orders placed via the ProRealTime platform are taken into account for minimum volume conditions.

If you don't meet these conditions, you will be downgraded to Standard pricing.

If you then meet these conditions during 3 consecutive months, you can request via email to upgrade to the corresponding pricing.

¹ 1 round-trip trade = 1 entry + 1 exit. 2 position entries (or 2 exits) also count as 1 round-trip trade for the conditions above.

² Contracts traded = Contracts bought + Contract sold. If you buy then sell 1 contract, this counts as 2 contracts traded.

Stocks, ETFs

Also applies to **warrants, turbos and certificates**

Trader > 30 round-trip trades per month

COUNTRY	FEE PER ORDER	MINIMUM
United States	\$0.005 per share traded + exchange fees	\$1.95
United Kingdom	0.06% of trade value + exchange fees	£2.95
Belgium	0.06% of trade value + exchange fees	€2.95
France	0.06% of trade value + exchange fees	€2.95
Germany	0.06% of trade value + exchange fees	€2.95
Italy	0.06% of trade value + exchange fees	€2.95
Netherlands	0.06% of trade value + exchange fees	€2.95
Austria	0.06% of trade value + exchange fees	€2.95
Portugal	0.06% of trade value + exchange fees	€2.95

Instruments quoted in USD on European markets

For instruments quoted in USD on European markets, commission is paid in USD:

- trades executed on Euronext Paris or Euronext Amsterdam: same fee per order as stocks quoted in EUR (min \$2.95 / \$3.95 / \$4.95 in Trader / Active / Standard, max \$49),
- trades executed on SWX or LSE: same fee per order as stocks quoted in CHF or GBP (min \$2.95 / \$3.95 / \$4.95 in Trader / Active / Standard),
- trades executed on other European markets: same fee per order as the US markets (min \$1.95).

Interests when trading in foreign currencies

Interactive Brokers accounts are multi-currency accounts, which means you can hold a cash balance in multiple different currencies on the same account.

When you buy securities in a currency you do not hold, your available funds in other currencies are not automatically converted.

Instead, the required funds will be borrowed from Interactive Brokers to finance the trade, which will result in a negative cash balance in that currency.

Whenever you keep a negative cash balance at the end of day, interests apply on this balance.

Example: You make a deposit for €10,000 (cash in € = €10,000, cash in \$ = 0). If you buy \$1,000 of US stocks, this amount will be automatically borrowed to finance the transaction (cash in € = 10,000, cash in \$ = -1,000). Interests apply on the borrowed amount until your cash in \$ becomes positive again.

Note that you can manually convert funds you hold in other currencies before the trade to avoid paying interests.

[Click here](#) to learn more and see the current rates.

Interests on margin trading and short-selling

Margin trading

Whenever you try to buy stocks for a value greater than the cash available on your account, the trade will be financed automatically by borrowing the funds needed (provided that you have the margin required).

Whenever you keep a negative cash balance at the end of day, interests apply on this balance.

Example: You make a deposit for €10,000 (cash = €10,000). If you buy €20,000 of stocks, €10,000 will automatically be borrowed to finance the trade (cash = -€10,000). Interests apply on the borrowed amount until your cash becomes positive again.

[Click here](#) to learn more and see the current rates.

Short-selling

When you short-sell a stock, the shares sold are automatically borrowed (provided that there are enough available to borrow).

If you keep this position for several days, interests apply on the value of the borrowed shares.

Contact us for more information.

Financial transaction taxes

The taxes below apply to instruments listed in France, Italy, UK and Spain. Please note that these tax rates might be subject to change in the future.

- France: securities issued by French companies with a market capitalization of at least €1 billion as of December 1st (reviewed annually) are subject to a transaction tax of 0.4 %.
- Italy: securities issued by Italian companies with a market capitalization of at least €500 million are subject to a transaction tax of 0.12 % (0.22 % for OTC transactions).
- United Kingdom: securities issued by companies based in the United Kingdom are subject to a stamp duty tax of 0.5 %.
- Taxation on Spanish Stocks: the Spanish Financial Transaction Tax (FTT) of 0.20% is applied to all purchases of Spanish shares and equity-linked securities (i.e. depositary receipts) in listed companies with a capitalisation above €1 billion.

Additional tax for Belgium residents

Belgium residents are liable to pay the tax on stock-exchange transactions for the disposal and acquisition for a consideration of Belgian or foreign securities, or the repurchase of own capitalisation shares by an investment company. Since August 1st, 2021, to simplify the administrative work on ProRealTime Trading account, Interactive Brokers and ProRealTime will automatically:

- compute the amount of this tax for each eligible transaction,
- deduct this amount from the account,
- take care of the declaration and the payment of the tax to the Belgian state.

ADR (American Depositary Receipt) Fees

The Depository Trust Company (DTC) collects custody fees on behalf of ADR agents for ADRs which do not pay periodic dividends. The fees are deducted by DTC in standard billing and will be passed to accounts which held the ADR on the record date.

For additional information on the fee you can consult the ADR prospectus.

Instruments traded from the broker's platforms

The financial instruments below are only available from the Desktop and Mobile platforms offered by the broker. The orders and positions on these instruments will be visible only in these platforms and not in ProRealTime.

The real-time access of your ProRealTime platform and the platforms offered by the broker are independant. The real-time access for the broker's platforms can be managed from the broker's account management interface and are paid directly to the broker.

Only orders placed on the ProRealTime platforms are taken into account for the volume conditions of the Active or Trader pricing and for platform credits.

Forex CFD Interests

Carry interest is calculated daily on all open Forex CFD positions held at the close of the trading session.

The applicable interest rate is the difference between the base currency benchmark rate and quote currency benchmark rate, plus/minus the mark-up indicated below.

Pair BM = Base currency benchmark rate - Quote currency benchmark rate

CURRENCY PAIR	TIER I	TIER II	TIER III
Major pairs	1 - \$1,000,000.00 Pair BM +/- 2 %	1,000,001 - \$10,000,000.00 Pair BM +/- 1.75 %	\$10,000,000.00 Pair BM +/- 1.5 %
Exotic pairs	1 - \$1,000,000.00 Pair BM +/- 2.5 %	1,000,001 - \$10,000,000.00 Pair BM +/- 2.25 %	\$10,000,000.00 Pair BM +/- 2 %

Exotic pairs are all currency pairs that includes at least one of the following currencies: CNH, CZK, HKD, HUF, ILS, MXN, PLN, ZAR.

Other fees on Metals

Metals storage and borrow fees

A storage cost of **0.1% per year (0.1%/360 per day)** applies when you hold **long positions** overnight on spot metals.

Borrow fees apply when you hold **short positions** overnight on spot metals.

The applicable interest rate is the USD benchmark rate plus the mark-up indicated below. BM= Benchmark rate

	Tier I	Tier II	Tier III
XAUUSD, XAGUSD	0 - 1,000,000 USD BM + 1 %	1,000,001 - 10,000,000 USD BM + 0.5 %	>10,000,000 USD BM + 0.3 %

Example

- Long position: 100 XAUUSD at \$2000.
=> Storage fee = $2000 * 100 * 0.1\% / 360 = \0.56 per day
- Short position: -100 XAUUSD at \$2,000, considering a USD benchmark rate at 5.33%.
=> Borrow fees = $2,000 * 100 * (5.33 + 1)\% / 360 = \35.17 per day

PRT Credits

Earn PRT credits on each trade

For each executed order or contract through the ProRealTime platforms on the following instruments, you get a PRT credit.

Micro DAX and Micro Estox50 Futures	0.25 credit per contract
Micro US Futures ¹ , Mini DAX and Mini IBEX	0.5 credit per contract
Other Futures and Options ²	1 credit per contract
Stocks	1 credit per order
Metals	1 credit per order

¹ Also includes Options on Micro US Futures.

² Also applies to Micro Bitcoin Futures.

How does it work?

Use your PRT credits to **get additional services for free** or at a reduced cost.

$$1 \text{ PRT credit} = \text{€}1 \text{ rebate}$$

Additional notes

- PRT credits are only available if you have a recurring platform subscription plan.
- 1 credit is equivalent to a €1 value reduction on your monthly subscription price (incl. VAT). Credits are not redeemable for cash. Credits can be used to reduce monthly subscription fee (including real-time market data fees).
- Rebates from PRT credits are applied automatically at the beginning of each month, based on the credits you received from the previous month. You will see them reflected as a discount on your invoice.
- If the amount of credits you get on a given month exceeds your monthly subscription price, up to 50 of the remaining credits can be used for the following months (up to 200 with the Complete license, up to 2,000 with the Premium license).
- Any remaining credits will expire after 6 months if unused.
- If your trading platform subscription payment is in USD, the rebates will be converted from EUR to USD at the rate on the day the rebate is used.
- For joint accounts, credits can either be shared evenly between the two accounts, or allocated fully to one of the two accounts. Contact us to learn more.
- Prices above apply to non-professional users with regards to data providers. Please refer to [our pricing page](#) for professional users with regards to data providers.

Other fees

These fees are charged on your account by Interactive Brokers.

Monthly withdrawals

	WITHDRAWAL IN EUR	WITHDRAWAL IN USD	WITHDRAWAL IN CHF	WITHDRAWAL IN GBP
First withdrawal each month	Free	Free	Free	Free
Additional withdrawals in the same month	€1	\$10	CHF 11	£7

- Additional withdrawals fees in the same month in EUR are: €1 per SEPA wire transfer. €8 per non-SEPA wire transfer.
- The withdrawal fees do not include processing fees by your bank or the correspondent bank which may be deducted from the wire proceeds.
- All deposits must be made by bank wire transfer. Checks and physical currency (cash) deposits are not accepted.

Telephone orders and archived statements

SERVICE	FEE ^{1, 2}
Telephone orders in EUR	€30 per order
Telephone orders in USD	\$30 per order

SERVICE	FEE IN EUR	FEE IN USD
Statements in the past 7 years	Free	Free
Statements older than 7 years	€20	\$25

¹ Fixed additional fee for telephone orders in other currencies available on request (ex: order in CHF: CHF 30, order in £: £25).

Telephone orders are only available to close positions. The fees above are in addition to all normally applicable brokerage fees.

² For French PEA accounts, a maximum fee of 1.2% of transaction value applies for phone orders.

Negative interests

If you trade with margin loans or you trade a financial instrument quoted in a currency that you do not hold, the broker will create a loan for those funds if you have sufficient margin excess. When you receive a loan of this type, the interest rates noted in this section apply to positions held overnight only.

- Note that ProRealTime may receive positive interest on deposits in certain currencies and that ProRealTime does not pay positive interest.
- When calculating rates, keep in mind that a blended rate based on the tiers below is used. For example, for a balance of 150,000 EUR, the first 90,000 is charged at the Tier I rate, the next 60,000 at the Tier II rate.
- The tiers which interest is based upon may change from time to time without prior notification. Such adjustments are done periodically to adjust for changes in currency rates.

Instruments traded from the broker's platforms

The financial instruments below are only available from the Desktop and Mobile platforms offered by the broker. The orders and positions on these instruments will be visible only in these platforms and not in ProRealTime.

The real-time access of your ProRealTime platform and the platforms offered by the broker are independant. The real-time access for the broker's platforms can be managed from the broker's account management interface and are paid directly to the broker.

Only orders placed on the ProRealTime platforms are taken into account for the volume conditions of the Active or Trader pricing and for platform credits.

Index CFDs

	CFD CURRENCY	FEE PER ORDER (% OF TRADE VALUE)	MINIMUM FEE PER ORDER
Europe	GBP	0.015%	£3
	EUR	0.015%	€3
	CHF	0.015%	CHF 3
United States	USD	0.015%	\$3
Asia	JPY	0.02%	¥120

USA bond transaction exchange fees depend on the place of execution: [BondDesk](#), [IBKRATS](#), [MuniCenter](#), [NYSE](#), [VALUBOND](#).

Mutual funds

		FEE PER ORDER (% OF TRADE VALUE)	MINIMUM FEE PER ORDER
Europe	Mutual funds	0.1 % of transaction value	€5

All the fees indicated in this document are paid directly to the broker from your trading account and include exchange fees, regulatory fees, and ProRealTime's commission unless otherwise specified. ProRealTime's commission for an order on a given instrument is equal to the difference between the fees listed in this document and the amount charged by Interactive Brokers to direct customers for an order on the same instrument using Tiered pricing as listed on the Interactive Brokers website (or the standard pricing when Tiered pricing is not available). The fees are the same for orders transmitted via ProRealTime's platform or platforms provided by Interactive Brokers. For more detailed information, contact us.
